

CASE STUDY

Formaster chooses Xopero QNAP Appliance and saves time, money and storage on QNAP servers

Challenge

Creating a backup infrastructure to one of the largest polish tech manufacturer was a real challenge. However, Xopero team coped with this task perfectly. Formaster have had an extensive infrastructure: R & D laboratories, design department, several fully automated production lines, warehouses and offices. There was also a large IT infrastructure based on QNAP servers.

Data are the most precious assets of the company, just after their patents. That's why, the company was searching for a reliable partner. One who could deploy a comprehensive backup solution that would guarant a maximal protection of all critical data - from the production and product testing, an administrative data and logistic as well.

Solution

Formaster have been very clear with expectations. The company needed a comprehensive backup solution that would protect 30 TB of data from 100 workstations (endpoints), 6 servers and 5 virtual machines.

After several weeks of testing, the company decided to implement Xopero QNAP NAS Appliance - the only solution on the market that turns QNAP NAS into private cloud backup.

Xopero is a fully professional backup solution, but it goes beyond just backing up data. It offers full control over all backups processes: allows centrally manage all backups, monitor their accuracy and remotely manage user account and the applications installed on company devices as well.

Benefits

- **no additional devices:** Xopero is a backup solution dedicated to QNAP NAS, so there was no need for Formaster to develop IT infrastructure,
- **simple and fast implementation:** Xopero installation on QNAP device takes only few minutes and then you have everything to start performing and managing all backups. QNAP NAS is also an ideal backup center, with large storage capacity and excellent file transfer speed,
- **complete data protection:** with Xopero you can backup and restore files, folders, endpoints, servers, databases (MS SQL, MySQL, PostgreSQL, Firebird), mail accounts (Microsoft Outlook and Exchange 2007,2010, 2013), network locations and virtual environments (Hyper-V and VMware),

FORMASTER®

Client:

FORMASTER

Industry:

tech manufacturer

Process:

backup of all business environment:

- endpoints,
- servers
- and virtual machines backup

Solution:

Xopero QNAP Appliance

Benefits:

comprehensive protection, fast deployment, reliability, support.

Formaster is a company with 30 years of experience of developing production of water heaters, water filters, filtering cartridges and vacuum containers.

The company is cooperating with several leading distributors from all around the world, for example: Biocera, Tesco, Lidl, Sainsbury, Metro Group and Kaufland.

- **efficiency:** thanks to advanced technology backup process can be done really fast. In order to save time and to reduce the load transfer, only the changed file blocks are always transmitted.
- **central management:** application's Management Center is the perfect tool that allows remotely configure users accounts, applications installed on company devices, monitor and configure all processes of performed backup.

We are the leading producer of backup solutions in Europe, providing professional tools for comprehensive backup of critical business data.

Our offer includes, among others appliance backup, local backup, cloud backup, hybrid backup and complex disaster recovery and business continuity solutions. Xopero products allow backup and recovery of files, folders, endpoints, databases, mailboxes, servers, network localizations and virtual environments.

Our customers belong to many different sectors: SMB, public administration, banking and finances, education, medicine, telecommunications and IT.
