

CASE STUDY

Xopero QNAP Appliance protects slupsk factory Pomorzanka

Challenge

Slupsk factory Pomorzanka specializing in the production of the confectionery was looking for a professional and quick to deploy backup solution to secure office workstations. Endpoints are considered to be the most critical elements in all IT infrastructure. Therefore, apart from requirement to provide automated, fast and secure backup of ERP system servers and central management the most important issue was the safety of data stored on desktops and laptops.

Solution

Pomorzanka have tested many solutions available on the market but nothing was quite right. Then they learn about Xopero Backup and our backup solution dedicated to QNAP NAS.

„Implementation of Xopero QNAP Appliance hit the spot. It allowed to collect and secure data from servers and endpoints, along with possibility to store them in a different branch. (as an additional precaution) Now managing of all backup processes takes much less time – instead of a dozen hours, just one hour per month.”

Pomorzanka, Leszek Borkowski

Xopero QNAP Appliance allows to secure large amounts of key information from endpoints. What's more, thanks to central management all backup process can be done automatically, so there is no need to engage any staff members. Now Pomorzanka IT Department spend much less time on managing backup projects – that time have been reduced by about 90% and that is really marvelous improvement.

Benefits

- **Savings:** thanks to Xopero there was no need to develop bigger IT infrastructure. QNAP NAS and Xopero is all what the company needed to get started managing backups.
- **Fast deployment:** Xopero installation on QNAP device takes only few minutes and then you have everything to start performing and managing all backups.

Client:

Pomorzanka

Industry:

food

Process:

endpoint backup - 17 workstations

Solution:

Xopero QNAP Appliance

Benefits:

savings,
fast deployment,
security.

Slupsk factory Pomorzanka exists on the confectionery market for several decades now. It also is a great example for that the attachment to the tradition and old recipes can be the best way to distinguish business from the competition.

- **Security:** Xopero uses AES 256 algorithm - advanced encryption, which is used by online banking as well - for data protection. In addition, the whole process takes place before any data are being sent to the server.
- **Technology:** thanks to advanced technology backup process can be done really fast. In order to save time and to reduce the load transfer, only the changed file blocks are always transmitted.

We are the leading producer of backup solutions in Europe, providing professional tools for comprehensive backup of critical business data.

Our offer includes, among others appliance backup, local backup, cloud backup, hybrid backup and complex disaster recovery and business continuity solutions. Xopero products allow backup and recovery of files, folders, endpoints, databases, mailboxes, servers, network localizations and virtual environments.
