EASILY AND AUTOMATICALLY
backup your Microsoft 365

👍 Simple as it never was...

Simply add the Microsoft 365 organization account in our panel to start protecting your Microsoft services. Add it once to protect all the time.

✨ Backup as you wish...

Define whether the backup should be made once or automatically at a specified frequency. Set it up once and forget it - it will work as you wish...

👥 Cross-user recovery

Restore protected data to the original user mailbox or choose a different one from your Microsoft 365 organization account.

📧 Backup of all your mailboxes

Choose one, many, or all mailboxes of your company that you want to protect. Create a complete backup copy and keep it safe on your data storage.

👁 Keep an eye on your data

Easily search through protected mailboxes by username, e-mail address, or user alias and browse messages inside the mailbox.

🔒 Encrypted backup

Your data are encrypted by AES 256 CBC algorithm considered as impossible to break. Only you can decrypt them.

☂ Protect shared mailboxes

Do you share mailboxes with your colleagues? Don't lose your data. Protect them as simple as individual ones.

⬇ Restore what you need

Choose whether you want to restore the entire mailbox, multiple messages, or just a single one.

🗄 Storage saving

We respect your storage - thanks to deduplication and compression our backup is faster and your storage saved.

Easily and automatically backup your Microsoft 365
