

# Xopero Sphere Recovery Drive

Lightning-fast and reliable resumption of ICS/OT systems, or Business Continuity wrapped up in a handy device.

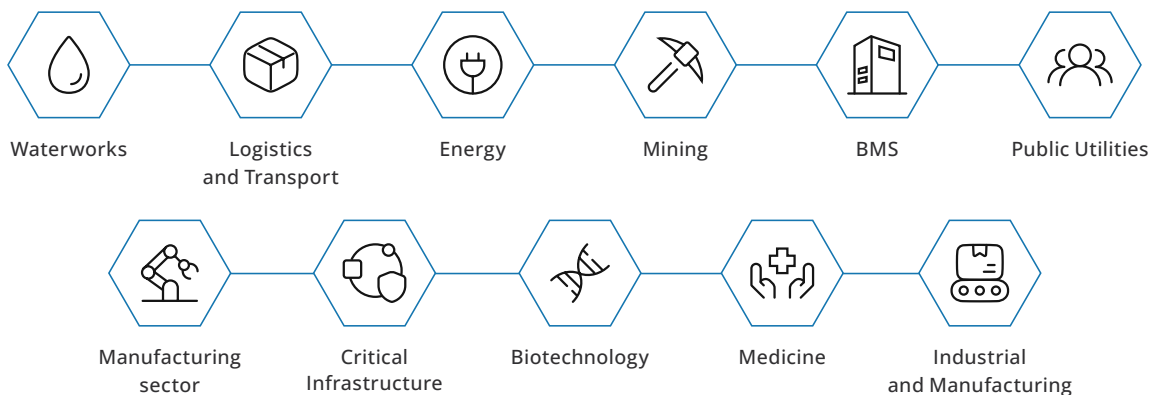

**Xopero Sphere Recovery Drive (XSRD)** is a mobile backup and data recovery device designed for the rapid assurance of continuity in ICS/OT systems.

It's an immediate solution for any cause of data loss - from human errors, through failures, to cyber attacks and ransomware - ensuring rapid system restoration and achieving the expected Recovery Time Objective (RTO) and Recovery Point Objective (RPO).

## Xopero Sphere Recovery Drive provides:

- ✓ Data import into the Xopero ONE ecosystem
- ✓ Ease of use and full control over the backup process
- ✓ Protection against attacks, failures and device destruction
- ✓ Support for any systems, including Windows and Linux
- ✓ 1TB capacity for data backups
- ✓ Offline backups and securing isolated environments
- ✓ Immediate availability of OT/IT systems
- ✓ Offline restoration - no network access required

## An ideal solution for critical industries:

**Xopero Sphere Recovery Drive** is an indispensable **Business Continuity** and **Disaster Recovery** device for any company looking to boost their resilience to unforeseen situations and seeking rapid solutions. Your critical data and systems are secure, allowing you to quickly and effectively restore full functionality and operational continuity.

### Replication and Easy Data Migration

With the Xopero Sphere Recovery Drive, you can also create a copy to any disk accessible from the device, including those connected via USB. Transfer backups between data repositories or import them into the central management console to ensure comprehensive protection with Xopero Unified Protection or Xopero Cloud.

### Support for Various Systems

The Xopero Sphere Recovery Drive secures a wide range of operating systems, including Windows Embedded and other popular versions of Windows or Linux. This broad compatibility makes it the perfect solution for organizations with diverse IT/OT environments.

### Flexibility in Performing Backups

The Xopero Sphere Recovery Drive allows for rapid creation of disk image backups of the device it's launched on. You have full control over the scope of data, the execution of backups, and their frequency.

### Offline Backup for Isolated Environments

The solution doesn't require internet or LAN access, enabling full functionality even in isolated or threatened network environment - the device operates completely independently.

### Immediate Availability

Thanks to the Xopero Sphere Recovery Drive, you can create a bootable medium to instantly restore IT/OT systems. In the event of a network failure or cyber attack, your systems can be quickly recovered, minimizing the impact of downtime on business operations and achieving high RTO results.

### Data Restoration Freedom

Restore disk image backups to the original device or another, even with a completely different hardware configuration, as long as it has the same or larger disk capacity. This capability is crucial for migrating to new hardware or recovering from hardware failures, ensuring minimal disruption to business operations.
